**Figure 1: Explanation of Process Flow Diagrams**

The following is an example of a table used to describe API request field details.

| Tag                  | Datatype                                            | Information and Rules                                                                                                                                                                                              | Input | Data |
|----------------------|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|------|
| requestExampleField1 | string<br>Maximum length: 10                        | An example of a field containing a string.                                                                                                                                                                         |       |      |
| requestExampleField2 | string<br>Length: 3<br>Must be a valid country code | An example of a field containing a country code                                                                                                                                                                    |       |      |
| requestExampleField3 | boolean                                             | An example field whose input and data requirements depend on the <code>getFieldsForProduct</code> API.<br><i>Additional Information</i><br>1. If <code>true</code> , then...<br>2. If <code>false</code> , then... |       |      |

## Definitions

- **Tag:** The field's XML tag; fields for which data is required are shown in bold red text
- **Datatype:** Describes the type and restrictions of the field's data
- **Information and Rules:** Provides additional information, business rules, and a description of the field if necessary
- **Input:** Indicates how the field's value is obtained
  - **Application:** The agent application must retrieve the data from another part of the agent application or from a previous MoneyGram API response. Data can be displayed on the application screen
  - **GUI:** The agent application must visibility the field on its user interface and allow user input
  - **Conditional:** The agent application may or may not visibility the field on the user interface for user input depending on the conditions stated in the Information and Rules column
  - **GFFP:** Whether or not the field is shown on the user interface for user inputs depends on the information returned by the `getFieldsForProductResponse` (GFFP)
  - **N/A:** Input does not apply; for instance, if the field only contains other fields

- **Not Allowed:** The agent application must not allow data to be entered in the field by the user. Data must not be displayed. The agent application must retrieve the data from another part of the agent application or from a previous MoneyGram API response
- **Optional:** The agent may choose whether to visibility the field on the user interface for user input
- **Data:** Indicates whether the field must contain data; only used on API requests
  - **Required:** The field must contain data
  - **Not allowed:** The field must not contain data
  - **Optional:** The agent must display the field on the user interface, but data collection is optional
  - **Conditional:** The field may or may not contain data depending on the conditions stated in the Information and Rules column
  - **GFFP:** Whether or not the field contains data depends on the information returned by the `getFieldsForProductResponse` (GFFP)
  - **Response:** Whether or not the field contains data depends on the information returned by a message specified in the additional information for the API

The following is an example of a table used to describe API response field details.

| Tag                                | Datatype                                            | Information and Rules                                                                                                                                                                                                    | Display  |
|------------------------------------|-----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <code>responseExampleField1</code> | string<br>Maximum length: 10                        | An example of a field containing a string.                                                                                                                                                                               | required |
| <code>responseExampleField2</code> | string<br>Length: 3<br>Must be a valid country code | An example of a field containing a country code                                                                                                                                                                          | optional |
| <code>responseExampleField3</code> | boolean                                             | An example field whose data and display requirements depend on the <code>getFieldsForProduct</code> API.<br><br><i>Additional Information</i><br>1. If <code>true</code> , then...<br>2. If <code>false</code> , then... | required |

## Definitions

- **Tag:** The field's XML tag; fields for which data is required are shown in bold red text

- **Datatype:** Describes the type and restrictions of the field's data
- **Information and Rules:** Provides additional information, business rules, and a description of the field if necessary
- **Display:** Indicates whether the value of the field is shown on the agent application's user interface
  - **Conditional:** The value may or may not be shown on the user interface depending on the conditions stated in the Information and Rules column
  - **GFFP:** Whether or not the value is shown on the user interface depends on the information returned by the `getFieldsForProductResponse` (GFFP)
  - **N/A:** Display does not apply; for instance, if the field doesn't contain displayable data
  - **Not allowed:** The value must not be shown on the user interface; for fields in API responses, the data in the field should not be edited unless otherwise stated
  - **Optional:** The agent may choose whether to show the value on the user interface
  - **Required:** The value must be shown on the user interface when data is returned in the API

# Overview

---

## ***Business Purpose***

- To develop an application that enables the enrollment of consumers into the MoneyGram Plus Rewards Program at the POS (point-of-sale). The enrollment process will specifically capture the consumer's profile information (name, address, phone number, etc.), marketing preferences, and any necessary compliance data, such as ID information and date of birth.

## ***API Flows and Processes***

### **Plus Rewards Registration Process**

1. The agent application sends a [saveRewardsRequest](#) containing the required registration information, and MoneyGram returns a [saveRewardsResponse](#) containing a MoneyGram Plus Rewards number.
2. The agent prints the MoneyGram Plus rewards number on a receipt and gives it to the customer.
3. The customer is able to use the MoneyGram Plus rewards number in future transactions. MoneyGram Plus rewards number must be used in feeLookupRequest and sendValidation API in mgiRewardsNumber field in order to get discount benefits

### **Required APIs**

1. [saveRewards](#)

## 1. saveRewards

### Business Rules to Code

1. For privacy reasons, the agent application GUI *must* include the wording "Customer advised and agrees to receive MoneyGram marketing information" or the equivalent translated text
2. The agent must include the newly-created MoneyGram Plus rewards number on the customer's transaction receipt
3. The following table is a list all the fields that agent must build. The last column indicates if the field is required in order to complete a MoneyGram Plus Rewards enrollment and any associated rule for the field.

| FIELD_NAME(XML TAG)  | Recommended Field Label                                   | Required or Optional                                                                                                                              |
|----------------------|-----------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| consumerFirstName    | First Name                                                | Required                                                                                                                                          |
| consumerMiddleName   | Middle Name                                               | Optional                                                                                                                                          |
| consumerLastName     | Last Name                                                 | Required                                                                                                                                          |
| consumerLastName2    | Second last name                                          | Optional                                                                                                                                          |
| consumerAddress      | Address                                                   | Required                                                                                                                                          |
| consumerCity         | City                                                      | Required                                                                                                                                          |
| consumerState        | State/Province                                            | Required based on country                                                                                                                         |
| consumerCountry      | Country                                                   | Required                                                                                                                                          |
| consumerZipCode      | Zip/Postal Code                                           | Required based on country                                                                                                                         |
| consumerHomePhone    | Primary Phone                                             | Required (must label as Primary Phone)                                                                                                            |
| consumerDOB          | Date of Birth                                             | Required                                                                                                                                          |
| consumerEmailAddress | Email                                                     | Rule - required if marketingByEmail is true                                                                                                       |
| marketingByEmail     | Yes, I want to receive marketing materials from MoneyGram | 1) Customer <i>must</i> opt-in to receive marketing either by Email or by Text Message/SMS.<br>2) marketingByEmail OR marketingBySMS must be true |
| marketingBySMS       | Yes, I want to receive marketing materials from MoneyGram | 1) Customer <i>must</i> opt-in to receive marketing either by Email or by Text Message/SMS.<br>2) marketingByEmail OR marketingBySMS must be true |
| marketingLanguage    | Marketing Language                                        | Required; list of available language is dependent on country                                                                                      |
