MoneyGram Reports

Version
15.12 (SP1)

2018

This AgentConnect® specification and the information contained herein is the **confidential property** of MoneyGram International, Inc. (MoneyGram), and is loaned to the recipient solely for use in integrating the MoneyGram System with the recipient's point-of-sale (POS) system as authorized by a Non-Disclosure Agreement entered between **MoneyGram** and the recipient. This document is also protected as an unpublished work under copyright law, and no part hereof may be compiled, distributed or disclosed to any third party without the prior written consent of **MoneyGram** except to persons having a legitimate need to know to integrate to the AgentConnect® System with the recipient's POS system as authorized in a POS license.

Other companies may have patents that apply to Money transfer or to the use of AgentConnect® within certain features. **MoneyGram** is not responsible for violations of any third party intellectual property rights by use of AgentConnect®.

The recipient's rights to integrate the AgentConnect® System with its POS system and/or using MoneyGram's confidential information will cease immediately upon termination of the Network Agreement or the Biller Agreement between MoneyGram and the recipient.

The following diagram explains the formats used in process flows throughout this document.

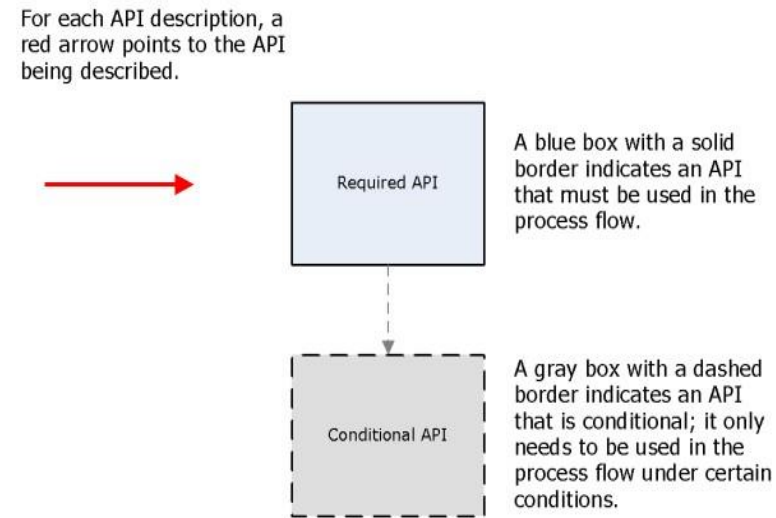

Figure 1: Explanation of Process Flow Diagrams

The following is an example of a table used to describe API request field details.

Tag	Datatype	Information and Rules	Input	Data
requestExampleField1	string Maximum length: 10	An example of a field containing a string.		
requestExampleField2	string Length: 3 Must be a valid country code	An example of a field containing a country code		
requestExampleField3	boolean	An example field whose data and visibility requirements depend on the <code>getFieldsForProduct</code> API. <i>Additional Information</i> 1. If <code>true</code> , then... 2. If <code>false</code> , then...		

Definitions

- **Tag:** The field's XML tag; fields for which data is required are shown in bold red text
- **Datatype:** Describes the type and restrictions of the field's data
- **Information and Rules:** Provides additional information, business rules, and a description of the field if necessary
- **Input:** Indicates how the field's value is obtained
 - **Application:** The agent application must retrieve the data from another part of the agent application or from a previous MoneyGram API response. Data can be displayed on the application screen
 - **GUI:** The agent application must display the field on its user interface and allow user input
 - **Conditional:** The agent application may or may not display the field on the user interface for user input depending on the conditions stated in the Information and Rules column
 - **GFFP or GFFR:** Whether or not the field is shown on the user interface for user inputs depends on the information returned by the `getFieldsForProductResponse` (GFFP) or `getFieldsForRewardsResponse` (GFFR)
 - **N/A:** Input does not apply; for instance, if the field only contains other fields

- **Not Allowed:** The agent application must not allow data to be entered by the user. Data must not be displayed. The agent application must retrieve the data from another part of the agent application or from a previous MoneyGram API response
- **Optional:** The agent may choose whether to display the field on the user interface for user input
- **Data:** Indicates whether the field must contain data; only used on API requests
 - **Required:** The field must contain data
 - **Not allowed:** The field must not contain data
 - **Optional:** The agent may choose whether to show the field on the user interface
 - **Conditional:** The field may or may not contain data depending on the conditions stated in the Information and Rules column
 - **GFFP or GFFR:** Whether or not the field contains data depends on the information returned by the `getFieldsForProductResponse` (GFFP) or `getFieldsForRewardsResponse` (GFFR)
 - **Response:** Whether or not the field contains data depends on the information returned by a message specified in the additional information for the API

The following is an example of a table used to describe API response field details.

Tag	Datatype	Information and Rules	Display
responseExampleField1	string Maximum length: 10	An example of a field containing a string.	required
responseExampleField2	string Length: 3	An example of a field containing a country code	optional
responseExampleField3	boolean	An example field whose data and visibility requirements depend on the <code>getFieldsForProduct</code> API. <i>Additional Information</i> 1. If <code>true</code> , then... 2. If <code>false</code> , then...	required

Definitions

- **Tag:** The field's XML tag; fields for which data is required are shown in bold red text
- **Datatype:** Describes the type and restrictions of the field's data

- **Information and Rules:** Provides additional information, business rules, and a description of the field if necessary
- **Display:** Indicates whether the value of the field is shown on the agent application's user interface
 - **Conditional:** The value may or may not be shown on the user interface depending on the conditions stated in the Information and Rules column
 - **GFFP or GFFR:** Whether or not the value is shown on the user interface depends on the information returned by the `getFieldsForProductResponse` (GFFP) or `getFieldsForRewardsResponse` (GFFR)
 - **N/A:** Visibility does not apply; for instance, if the field doesn't contain displayable data
 - **Not allowed:** The value must not be shown on the user interface; for fields in API responses, the data in the field should not be edited unless otherwise stated
 - **Optional:** The agent may choose whether to show the value on the user interface
 - **Required:** The value must be shown on the user interface if data is returned in the API.

Overview

Business Purpose

- This document provides technical and business information required to design an application to obtain detail and summary records of MoneyGram money transfer send, ExpressPayment and receive transactions performed by an agent location.

API Flows and Processes

MoneyGram Receive Summary Report Process

1. The agent application sends a [moneyGramReceiveSummaryReportRequest](#) containing a date, and MoneyGram returns a [moneyGramReceiveSummaryReportResponse](#) containing a total amount of all receive transactions for the agent location.

MoneyGram Send and ExpressPayment Summary Report Process

1. The agent application sends a [moneyGramSendSummaryReportRequest](#) containing a date, and MoneyGram returns a [moneyGramSendSummaryReportResponse](#) containing a total of all send and ExpressPayment transactions for the agent location.

MoneyGram Receive Detail Report Process

1. The agent application sends a [moneyGramReceiveDetailReportRequest](#) containing a date, and MoneyGram returns a [moneyGramReceiveDetailReportResponse](#) containing details of all receive transactions performed by the agent location.

MoneyGram Send and ExpressPayment Detail Report Process

1. The agent application sends a [moneyGramSendDetailReportRequest](#) containing a date, and MoneyGram returns a [moneyGramSendDetailReportResponse](#) containing details of all send and ExpressPayment transactions performed by the agent location.

Alternative Processes

1. Standard settlement reports including transaction data are available to all MoneyGram partners; contact a MoneyGram account representative for details
2. MoneyGram has options for reports that can be discussed with an account representative if the report APIs or information gathered from the AgentConnect transaction data and our standard settlement reports do not meet a partner's needs.

APIs

APIs

1. moneyGramReceiveSummaryReport
2. moneyGramSendSummaryReport
3. moneyGramReceiveDetailReport
4. moneyGramSendDetailReport
5. billPaymentDetailReport
6. billPaymentSummaryReport

1. *moneyGramReceiveSummaryReport*

The agent application uses the [moneyGramReceiveSummaryReport](#) API to retrieve a summary of all receive transaction amounts for the agent location.

Additional Information

1. MoneyGram returns an error message if no transaction information is available for the date specified in the [moneyGramReceiveSummaryReportRequest](#)
2. The [moneyGramReceiveSummaryReportResponse](#) returns results for one agent location
3. If a transaction is received and then reversed, it will not be counted for receive summary reports.

moneyGramReceiveSummaryReportRequest

Field Summary

- activityDate

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	date Format: CCYY-MM-DD	Date for which a report with the summary of receive transactions performed by the location	GUI	required

moneyGramReceiveSummaryReportResponse

Field Summary

- reportInfo
 - agentNumber
 - agentName
 - cashOrCheckAmount
 - otherPayoutAmount
 - receiveCurrency

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	complex Maximum number of occurrences: unbounded	None	N/A
agentNumber	string Maximum length: 6	This is the 6 digit legacy number that would also appear in the settlement report.	not allowed
agentName	string Maximum length: 40	The display name of Agent or the location as setup in MoneyGram system	optional
cashOrCheckAmount	decimal Minimum exclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	Sum of the face amounts for all the successful receive transactions excluding the reversed transactions for the particular date of activity	optional
otherPayoutAmount	decimal Minimum exclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	Total transaction amount paid out using a different payment method other than cash or checks. Value returned is zero if payout method is always cash	optional
receiveCurrency	string Length: 3	Indicates the currency of the transaction. A separate currency is returned for each currency	optional

2. *moneyGramSendSummaryReport*

The agent application uses the [moneyGramSendSummaryReport](#) API to retrieve a summary of all send and ExpressPayment transaction amounts for the agent location.

Additional Information

1. MoneyGram returns an error message if no transaction information is available for the date specified in the [moneyGramSendSummaryReportRequest](#)
2. The [moneyGramSendSummaryReportResponse](#) returns results for one agent location
3. If a send transaction was reversed on the day as the send, that transaction is not included in the summary total.

moneyGramSendSummaryReportRequest

Field Summary

- activityDate

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	date Format: CCYY-MM-DD	Date for which a report with the summary of send and ExpressPayment transactions performed by the location	GUI	required

moneyGramSendSummaryReportResponse

Field Summary

- reportInfo
 - faceAmount
 - feeAmount
 - totalAmount
 - sendCurrency
 - agentNumber
 - agentName

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	complex Maximum number of occurrences: unbounded	None	N/A
faceAmount	decimal Minimum exclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The sum of all the money transfer and ExpressPayment amounts for the transactions performed by the location for a particular date	optional
feeAmount	decimal Minimum inclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The sum of the fee amounts associated with all the successful send and ExpressPayment transactions performed by the location for a particular date	optional
totalAmount	decimal Minimum exclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The total amount including face and fee associated with all the successful send and ExpressPay transactions performed by the location for a particular date	optional
sendCurrency	string Length: 3	Indicates the currency of the transaction. A separate currency is returned for each currency	optional
agentNumber	string Maximum length: 6	This is the 6 digit legacy number that appears in the settlement report.	not allowed

Tag	Datatype	Information and Rules	Display
agentName	string Maximum length: 40	The display name of Agent or the location as setup in MoneyGram system	optional

3. moneyGramReceiveDetailReport

The agent application uses the [moneyGramReceiveDetailReport](#) API to retrieve details of all receive transactions performed by an agent location.

Additional Information

1. MoneyGram returns an error message if no transaction information is available for the date specified in the [moneyGramReceiveDetailReportRequest](#)
2. The [moneyGramReceiveDetailReportResponse](#) returns results for one agent location
3. The [moneyGramReceiveDetailReportResponse](#) includes refunded transactions

moneyGramReceiveDetailReportRequest

Field Summary

- activityDate

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	date Format: CCYY-MM-DD	Date for which a report with the details of each receive transaction performed by the location	GUI	required

moneyGramReceiveDetailReportResponse

Field Summary

- reportInfo
 - time
 - referenceNumber
 - receiverName
 - checkNumber
 - receiveAmount
 - agentNumber
 - payoutType
 - agentName
 - accountNumber
 - receiveCurrency

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	complex Maximum number of occurrences: unbounded	None	N/A
time	dateTime	None	optional
referenceNumber	string Length: 12	None	optional
receiverName	string Maximum length: 10	The receiver's last name	optional
checkNumber	string Maximum length: 14	None	optional
receiveAmount	decimal Minimum exclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	None	optional
agentNumber	string Maximum length: 6	This is the 6 digit legacy number that appears in the settlement report	not allowed

payoutType	string Valid values: ACHK, CCHK	<i>Additional Information</i> 1. ACHK means agent check or cash 2. CCHK means consumer check	optional
------------	------------------------------------	--	----------

Tag	Datatype	Information and Rules	Display
agentName	string Maximum length: 40	The display name of Agent or the location as setup in MoneyGram system	optional
accountNumber	string Maximum length: 20	<i>Additional Information</i> 1. Field does not apply to this product	optional
receiveCurrency	string Length: 3	Indicates the currency of the transaction	optional

4. *moneyGramSendDetailReport*

The agent application uses the [moneyGramSendDetailReport](#) API to retrieve details of all send and ExpressPayment transactions performed by an agent location.

Additional Information

1. MoneyGram returns an error message if no transaction information is available for the date specified in the [moneyGramSendDetailReportRequest](#)
2. The [moneyGramSendDetailReportResponse](#) returns results for one agent location

moneyGramSendDetailReportRequest

Field Summary

- activityDate

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	date Format: CCYY-MM-DD	Date for which a report with the details of each send and ExpressPayment transaction performed by the location	GUI	required

moneyGramSendDetailReportResponse

Field Summary

- reportInfo
 - referenceNumber
 - faceAmount
 - feeAmount
 - totalAmount
 - sendCurrency
 - agentNumber
 - paymentType
 - agentName
 - time

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	complex Maximum number of occurrences: unbounded	None	N/A
referenceNumber	string Length: 12	None	optional
faceAmount	decimal Minimum inclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The send amount for the transaction	optional
feeAmount	decimal Minimum inclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The fee amount for the transaction	optional
totalAmount	decimal Minimum inclusive value: 0 Maximum length: 14 Maximum decimal digits: 3	The total send, fee, and tax (if applicable) for the transaction	optional
sendCurrency	string Length: 3	Indicates the send currency of the transaction	optional

Tag	Datatype	Information and Rules	Display
agentNumber	string Maximum length: 6	This is the 6 digit legacy number that appears in the settlement report	not allowed
paymentType	string Valid values: CASH, CARD, CANCL	<i>Additional Information</i> 1. CASH means cash payment 2. CARD means credit or debit card payment 3. CANCL means the transaction was canceled	optional
agentName	string Maximum length: 40	The display name of Agent or the location as setup in MoneyGram system	optional
time	dateTime	None	optional

5. *billPaymentDetailReport*

The agent application uses the `billPaymentDetailReport` API to retrieve details of all Utility Bill Pay (UBP) transactions performed by an agent location.

Additional Information

1. MoneyGram does not return any error message if no transaction information is available for the date specified in the [billPaymentDetailReportRequest](#); an empty response is returned.
2. The [billPaymentDetailReportResponse](#) returns results for one agent location

billPaymentDetailReportRequest

Field Summary

- [activityDate](#)
- [productVariant](#)

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	Date Format: CCYY-MM-DD	Defines the date of the detail activity report for the particular location.	GUI	Required
productVariant	String Valid Values: UBP	Defines transaction type for generated reports	GUI/Applica tion	Optional

billPaymentDetailReportResponse

Field Summary

- reportInfo
- referenceNumber
- productVariant
- faceAmount
- feeAmount
- totalAmount
- infoFeeIndicator
- processingFee
- agentNumber
- paymentType
- agentName
- date
- status

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	Complex Maximum Number of Occurences: Unbounded		
referenceNumber	String Length: 12	None	Optional
productVariant	String	Indicates the type of transaction	Optional
faceAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	Transaction amount	Optional
feeAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	The fee amount for the transaction	Optional
totalAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	The total amount including face and fee amounts	Optional

Tag	Datatype	Information and Rules	Display
infoFeeIndicator	Boolean Valid values: true, false	Additional Information – for Utility Bill Pay(UBP) only 1. If true, the fee is an informational fee 2. If false, the fee is not an informational fee	Optional
processingFee	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	Applicable for Utility Bill Pay(UBP) only The processing fee charged by the biller.	Optional
agentNumber	String Length: 8	The 8 digit agent location ID	not allowed
paymentType	String Valid values: CASH, CANCL	None	Optional
agentName	String Length: 40	The display name of Agent or the location as setup in MoneyGram system	Optional
date	dateTime	The date timestamp of when the transaction was completed	Optional
status	String	None	Optional

6. *billPaymentSummaryReport*

The agent application uses the `billPaymentSummaryReport` API to retrieve a summary of all Utility Bill Pay (UBP) transaction amounts for the agent location.

Additional Information

1. MoneyGram does not return any error message if no transaction information is available for the date specified in the [billPaymentSummaryReportRequest](#); an empty response is returned.
2. The [billPaymentSummaryReportResponse](#) returns results for one agent location

`billPaymentSummaryReportRequest`

Field Summary

- [activityDate](#)
- [productVariant](#)

Field Detail

Tag	Datatype	Information and Rules	Input	Data
activityDate	Date Format: CCYY-MM-DD	Defines the date of the detail activity report for the particular location.	GUI	Required
productVariant	String Valid Values: UBP	Defines transaction type for generated report	GUI/Applica tion	Optional

billPaymentSummaryReportResponse

Field Summary

- reportInfo
 - productVariant
 - faceAmount
 - feeAmount
 - totalAmount
 - agentNumber
 - agentName

Field Detail

Tag	Datatype	Information and Rules	Display
reportInfo	Complex Maximum Number of Occurrences: Unbounded	None	N/A
productVariant	String	Defines transaction type for generated reports	Optional
faceAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	Sum of the face amounts for all Utility Bill Pay (UBP) transactions performed by the location for a particular date	Optional
feeAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	Sum of the fee amounts for all Utility Bill Pay (UBP) transactions performed by the location for a particular date	Optional
totalAmount	Decimal Maximum Inclusive Value: 0 Maximum Length: 14 Maximum Decimal Digits: 3	The total amount including face and fee amounts for all Utility Bill Pay (UBP) transactions performed by the location for a particular date	Optional
agentNumber	String Length: 8	The 8 digit agent location ID	not allowed

15.12

Tag	Datatype	Information and Rules	Display
agentName	String Length: 40	The display name of Agent or the location as setup in MoneyGram system	Optional
