Approvals

Approval refers to the approver's acceptance of the content and overall intention of this document, including acceptance of any commitments described in order to successfully deliver the initiative. The approver, where relevant, also confirms that this document complies with relevant strategies, policies and regulatory requirements.

Name	Role	Approved	Date
Umesh Thimmappa	Tigo, MFS Program Manager		
Tariq Dhiyebi	Tigo, TIGOPESA Manager		

1.1 Communication Protocol

The transport protocol of this interface is XML over HTTP.

The expected HTTP method is always POST.

The expected headers in the request & response are 'Content-type' & 'Connection'.

1.2 Request XML

A request to perform a function is sent using the COMMAND element.

```
POST <URL> HTTP
Content-type: text/xml
Connection: keep-alive
<?xml version="1.0"?>
<COMMAND>
-----
-----
-----
</COMMAND>
```

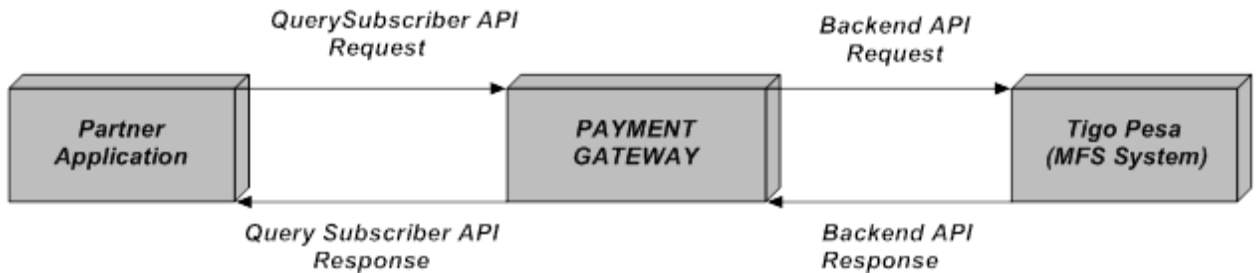

1.3 Response XML

The response to a request to perform a function uses the COMMAND element.

```
HTTP/1.1 200 OK
Content-type: text/xml
Connection: close
<?xml version="1.0"?>
<COMMAND>
-----
-----
-----
</COMMAND>
```

2.1 QUERY SUBSCRIBER NAME

Partner (Third-party) can Query the Tigo Subscriber Name from TigoPesa system – Synchronous protocol

2.1.1 Input from the Partner Application to the Payment Gateway System– ‘Query Subscriber’ API Request

Field name	Max-length	Description
TYPE	20	The request type of the transaction. The value will be constant in all the request. Ex - QuerySubscriberReq
REFERENCEID	20	A value consisting of combination of alphanumeric characters that uniquely identifies each request made by the Partner Application. REFERENCEID field has to be unique. Ex - SUBQ000000001 Note: Maximum allowed length for this element is restricted to ‘20’.
MSISDN	10/12	Payer MSISDN can be with or without country code. Ex – 255721777777
PIN	4	Payer MSISDN’s PIN

TIGOPESA – QUERY SUBSCRIBER NAME API Details

Field name	Max-length	Description
MSISDN1	10/12	Payee MSISDN: The subscriber MSISDN

Sample request message from the Partner application to the Payment Gateway (QuerySubscriber API) is attached here.

```
<?xml version="1.0"?>
<COMMAND>
  <TYPE>QuerySubscriberReq</TYPE>
  <REFERENCEID> SUBQ000000001</REFERENCEID>
  <MSISDN>25572177777</MSISDN>
  <PIN>1234</PIN>
  <MSISDN1>255721777772</MSISDN1>
</COMMAND>
```

2.1.2 Output from the Payment Gateway System to the Partner Application – ‘Query Subscriber’ API Response

Field name	Max-length	Description
TYPE	20	Response Type. The value will be constant in all the response. Ex - QuerySubscriberResp
TXNSTATUS	7	Various transaction status Failed, Success etc. Ex – 0 or 200 for success
MESSAGE	160	Response message.

TIGOPESA – QUERY SUBSCRIBER NAME API Details

		Ex - Success
TXNID	20	Tigo Transaction ID for the Subscriber Query. The unique number that identifies the transaction in the TIGO platform. Ex - 23450001
