Move Money Processes – Pesalink Switch Upgrade

Process Name	Move Money – Pesalink Switch Upgrade
Background	PESALINK is an instant, online real – time electronic fund transfer (EFT) platform. It enables financial institutions to provide instant funds transfer services and bill payments to their customers based on bank account numbers through all available electronic channels. The platform leverages on the secure virtual private network (VPN) connections between financial institutions and the Integrated Payment Services Limited to deliver a seamless financial service to the industry.
The Problem Statement	The current Pesalink Switch is on ISO8583 which is card based. The switch is limited in implementing overlay solutions. The response codes are also card based and don't speak to the exact scenarios at the bank. This has warranted the move to a new Pesalink Switch based on ISO 20022. Pesalink 2.0 with new features and capabilities will enhance various initiatives embarked upon by banks for digital transformation, improved efficiency and higher productivity while positioning banks for a real-time economy.
Affected	The proposed initiative affects; - Systems • Digital Channels • Finance • Omni Channel Business Teams • Payments Teams • Branches • Head Office Departments – Operations, Shared Services
Customer User Stories	1. As an Equity customer, I want to be able to register for Pesalink service on digital channel. 2. As an Equity customer, I want to be able to deregister Pesalink service on digital channel. 3. As an Equity customer, I want to be able to transfer funds from my account to another bank. 4. As a mobile and internet banking user, I want to be able to specify repeat payments from the payments made to beneficiaries where I can tap on a previous transaction and send money again without entering the recipient data again. 5. As an Equity customer, I want to be able to transfer funds in bulk from my account other bank(s) through digital channel. 6. As an Equity customer, I want to be able to transfer funds in bulk from my account other bank(s) through the Branch. 7. As an Equity customer, I want to be able to make request to pay from a customer (debtor) in another bank and receive payments in my account through digital channel.

BUSINESS PROCESS INNOVATION

Customer Journeys	1. Register and De-register 2. Transfer Funds to Local Banks 3. Set –Up Standing Order 4. Transfer Funds in Bulk - Channel 5. Transfer Funds in Bulk – Bank 6. Request to Pay
A successful solution would be	The solution that is developed should have the following capabilities: - • Fulfilment screens on One Equity • Self-service delivery of payments and transfers for customers on One Equity channels both scheduled and one-time payments. • Self- service management of transaction and channel limits for the customers on all One Equity channels
Critical success factors	1. Enhanced Customer Experience 2. Operation efficiency and improved TAT 3. Enhanced customer security
