- › Estimates

BUSINESS REQUIREMENTS

- › Equity Rwanda would like to enable users to send money from their Equity Account to any MTN Mobile Money Subscriber.
- › Users should be able to do a deposit from their Mobile Money to Equity Rwanda specified account which will have been entered by the user.
- › Equity Bank should receive a notification once their Mobile Money Service Provider account has been credited.
- › Linking of the Mobile Money to Equity Account during a Push/Pull operation should not be mandatory

SCOPE

› The Scope of this solution is:

- ✓ Enable Service Provider Transfer operation in ECW
- ✓ Enable Approval request to be initiated by ECW to the User
- ✓ Configure M3 Settings for the Equity Bank Service Provider
- ✓ Configure AM for SMS Notifications
- ✓ AM Configuration to handle the debit Request from the Bank Side
- ✓ Configure F5 to allow for the Debit Request operation from the Bank
- ✓ Support MTN in SIT and UAT

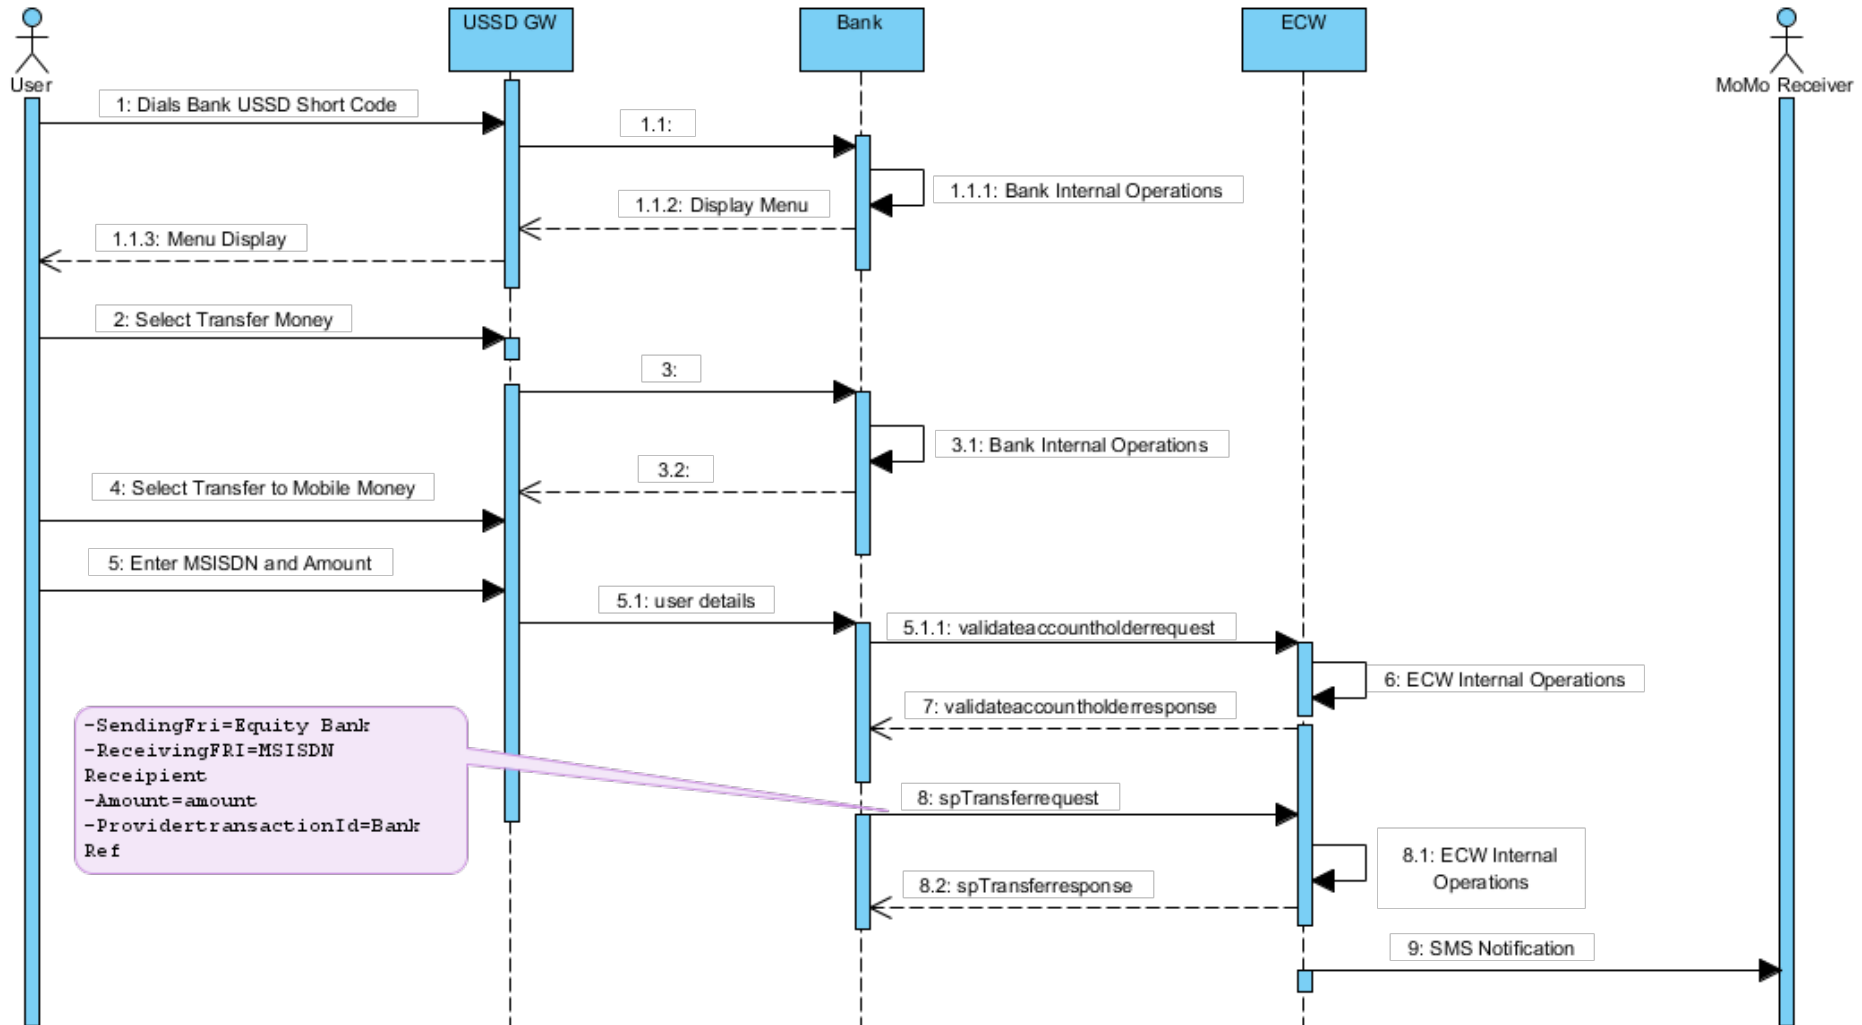

› How will the service be accessed?

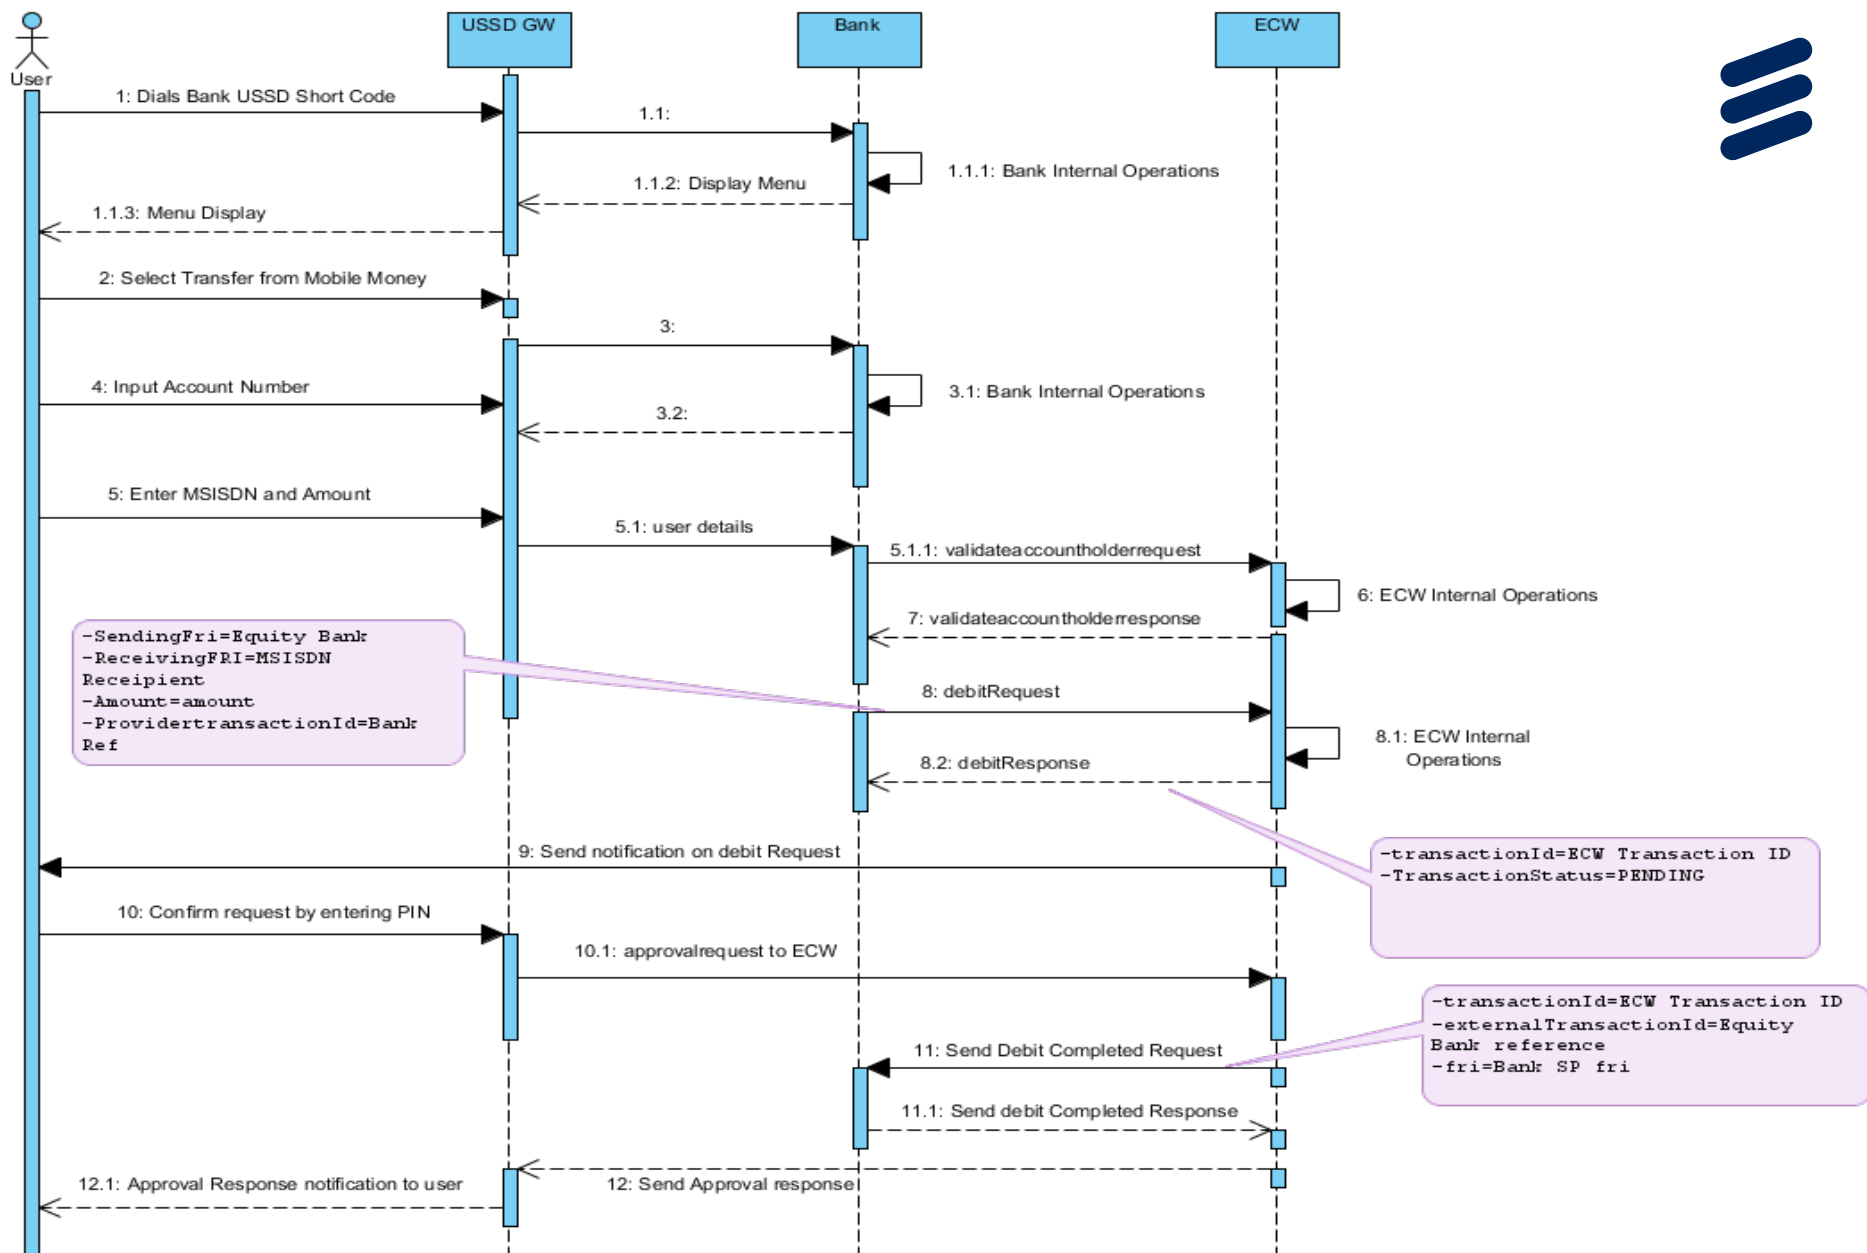

- Users will access the Money Transfer to MSISDN from the Bank USSD Menu for the Push feature
- Users will input the MSISDN of the MoMo account they want to deposit the money into.
- User will enter the amount of money they want transferred
- For the Pull feature, the user will access transfer Money to Bank Account services from the Mobile Banking USSD Menu.
- User will select either his Account Number or enter account number to deposit the Money.
- Mobile Money user will be requested to Approve the Debit Request from their account

› What is the customer experience like?

- Mobile Money users will transfer money from their E-money account to any Equity Bank Account number
- Mobile Money users will be able to transfer money from Equity Bank Account any Mobile Money eAccount.

CALL FLOWS

TECHNICAL FEATURES

> AM configuration

- Configure AM to handle the debit requests and response from Equity Bank
- Configure AM for the new notifications to be sent to the user.

> F5 Configuration

- F5 Configuration to allow a debit Request API from Equity Bank

> SMS Update

- SMS Notification of Debit request awaiting their approval.
- SMS notification of the Debit transaction once their account has been debited

ASSUMPTIONS & EXCLUSIONS

> Assumptions

- USSD Menu to access the Mobile Money services will be provided by the Bank
- Account Number validations will be done by the Bank
- Only USSD channel is considered in this Solution.
- Equity Account holder statuses will be validated by the bank.
- AML Checks for MoMo user are not altered by these additional features
- Currency should be the same at both the MM wallet and Equity end.
- Reconciliation with Equity Bank should be handled offline (outside the ECW platform).
- Equity Bank must be able to adapt to the Ericsson Service Provider API.
- Equity Bank must develop mechanism to handle EWP retries.

> Pre-Requisites

- The relevant APIs are shared by the bank
- Mobile Money Users have account with Equity Bank
- MoMo users are Registered and Active in Mobile Money
- MoMo users have funds to perform the Pull transactions from their Emoney accounts

ASSUMPTIONS & EXCLUSIONS 2

> Exclusions

- Bank Account number validation is not part of the scope
