TIGOPESA – Partner Integration API Details - TELEPIN

DOCUMENT CONTROL

Document Location
TIGO Rwanda

DOCUMENT DESCRIPTION

Document Name:	TIGOPESA – Partner Integration Telepin API Document
Document Author:	Posinath
Owner while current:	TIGO
Type of Document:	TIGOPESA – Partner Integration Telepin API Document

REVISION HISTORY

Version	Date	Changed by	Change Description
1.0	03-12-2015	Posinath Borusu	Baseline Initial version created.
1.1	18-12-2015	Posinath Borusu	Updated with request elements
1.2	25-12-2015	Posinath Borusu	Updated the WalletPayment Function

Approvals

Approval refers to the approver's acceptance of the content and overall intention of this document, including acceptance of any commitments described in order to successfully deliver the initiative. The approver, where relevant, also confirms that this document complies with relevant strategies, policies and regulatory requirements.

Name	Role	Approved	Date

3.2 Communication Protocol

The transport protocol of this interface is HTTP, version 1.1.

The expected HTTP method is always POST.

The expected headers are Content-Length and Content-Type (text/xml).

3.3 Request XML

A request to perform a TCS function is sent using the TCSRequest element.

TCSRequest Example –

```
POST /TELEPIN HTTP/1.1
Content-Length: 288
Content-Type: text/xml
<?xml version="1.0" ?>
<TCSRequest>
  <UserName>6131110000</UserName>
  <Password>1234</Password>
  <Function name="PAYMENT">
    <param1>6132220000</param1>
    <param2>10</param2>
    <param3>123456789</param3>
    <param4>REMARK</param4>
  </Function>
</TCSRequest>
```

3.4 Response XML

The response to a request to perform a TCS function uses the TCSReply element.

TCSReply Example –

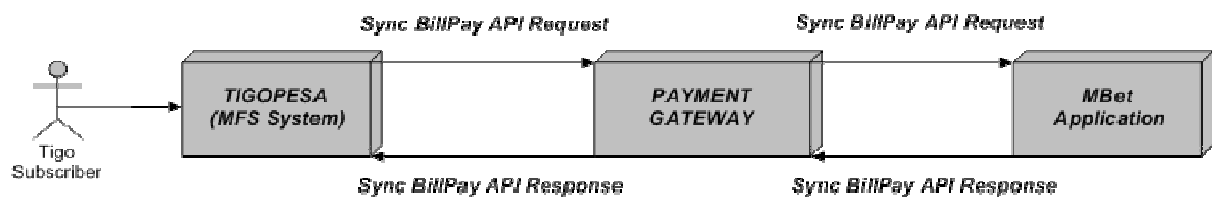

```
HTTP/1.1 200 OK
Content-Length: 142
Content-Type: text/xml
Connection: close
<?xml version="1.0" ?>
<TCSReply>
  <Result>0</Result>
  <Message>Cash Out successful</Message>
  <param1>6789</param1>
```

```
</TCSReply>
```

3.5 Use Case 1: PAYMENT

This use case is used to pay the bill. Biller company has to send the response with result code.

FUNCTION NAME - PAYMENT

Request Elements

Element	Description	Type	Inclusion
msisdn	The account mobile number including country code.	Numeric String (12)	M
amount	The bill payment amount.	Float	M

transactionId	The sales order number, a Telepin internal reference number.	String (15)	M
billNumber	The bill number	String (20)	M
companyCode	The bank institution/biller code	String (15)	M

Sample request message is attached here.

```

<TCSRequest>
  <UserName>XXXXXX</UserName>
  <Password>xxxxx</Password>
  <Function name="PAYMENT">
    <msisdn>255712230324</msisdn>
    <amount>2000.0</amount>
    <transactionId>1191</ transactionId >
    <billNumber>41602900026</billNumber>
    <companyCode>888999</ companyCode>
  </Function>
</TCSRequest>

```

Reply Elements

Element	Description
transactionId	TransactionId from the request
referenceId	The bank reference ID for this transaction.
status	The three-letter status ID for the transaction: • PST = posted, payment successful • DCL = declined, payment declined Any other status will be interpreted as DCL
voucherCode	The bill voucher code (if supported)

TIGOPESA – Partner Integration API Details - TELEPIN

Element	Description
message	Message to bill payer (optional, limit is 50 characters)

Sample response message is attached here.

```
<TCSReply>
  <Result>0</Result>
  <Message>Bill Payment successful. Reference</Message>
<transactionId>1191</transactionId>
  <referenceId>000174213641</ referenceId >
  <status>PST</status>
<voucherCode>123</voucherCode>
<message>Dear Customer ,payment success</message>
</TCSReply>
```

PARTNER APPLICATION ERROR CODES:

Error Code	Description	Example of User Error Message
0	Success	Transaction successful
200001	Account Mobile number does not exist or not found	Your account was not found at the Trust Bank.
200002	Account not permitted to perform operation	Your account is not permitted to perform this operation

200004	Zero amount specified	Unable to perform this transaction for an amount of zero
200005	Invalid amount specified	Unable to perform this transaction, the amount specified is invalid
200006	Multiple transactions with Sales Order Number provided	System error. Please contact customer support.
200099	Other error not specified above	System error. Please contact customer support.
200100	Internal Application error	System error. Please contact customer support.

3.6 Use Case 2: CHECKBALANCE

This use case to know the balance of the bill which customer has to pay. Biller company has to send the response with amount value.

FUNCTION NAME – CHECKBALANCE

Element	Description	Type	Inclusion
msisdn	The account mobile number including country code	Numeric String (12)	M
billNumber	The bill number	String (20)	M
companyCode	The billing company code	String (15)	O

Sample here as below

```
<TCSRequest>
  <UserName>XXXXXX</UserName>
  <Password>xxxxx</Password>
  <Function name="CHECKBALANCE">
    <msisdn>255712230324</ msisdn >
```

TIGOPESA – Partner Integration API Details - TELEPIN

```
<billNumber>123456789</billNumber>
<companyCode>123</companyCode>
</Function>
</TCSRequest>
```

Reply Elements

Element	Description
amount	The bill payer's balance/outstanding amount
referenceId	Biller reference Id for the transaction

Sample Response

```
<TCSReply>
  <Result>0</Result>
  <Message>Balance Retrieved Successfully. </Message>
  <amount>20000.0</amount>
  <referenceId>PST</referenceId>
</TCSReply>
```

6.2 Use Case 3: TRANSACTIONSTATUS

This use case to know the transaction status. Biller Company has to response with payment response. This will be used to know the status when there is any connectivity issue between the systems.

FunctionName --TRANSACTIONSTATUS

Request Elements:

Element	Description	Type	Inclusion
msisdn	The account mobile number including country code	Numeric String (13)	M
transactionId	The sales order number, a Telepin internal reference number.		
billNumber	The bill number	String (20)	M
companyCode	The billing company code	String (15)	O

Sample Request:

```
<TCSRequest>
  <UserName>XXXXXX</UserName>
```

TIGOPESA – Partner Integration API Details - TELEPIN

```
<Password>xxxxx</Password>
<Function name="TRANSACTIONSTATUS">
  <msisdn>255712230324</msisdn>
<transactionId>1194</transactionId>
  <billNumber>123456789</billNumber>
  <companyCode>123</ companyCode >
</Function>
</TCSRequest>
```

Reply Elements:

Element	Description
transactionId	The sales order number, a Telepin internal reference number.
referenceId	The bank reference ID for this transaction.
status	The three-letter status ID for the transaction: • PST = posted, payment successful • DCL = declined, payment declined Any other status will be interpreted as DCL
voucherCode	The bill voucher code (if supported)
message	Message to bill payer (optional, limit is 50 characters)

Sample Response:

```
<TCSReply>
```

```

<Result>0</Result>
<Message>Bill Payment successful. Reference</Message>
<transactionId>1191</transactionId>
<referenceId>000174213641</referenceId>
<status>PST</status>
<voucherCode>123</voucherCode>
<message>Dear Customer ,payment success</message>
</TCSReply>

```

PARTNER APPLICATION ERROR CODES:

Error Code	Description	Example of User Error Message
0	Success	Transaction successful
200001	Account Mobile number or transaction does not exist or not found	Your account was not found at the Trust Bank.
200002	Account not permitted to perform operation	Your account is not permitted to perform this operation
200003	Multiple accounts found for Account Mobile number	Transaction cannot be completed as multiple accounts have been found for this mobile number. Please contact the bank.
200004	Zero amount specified	Unable to perform this transaction for an amount of zero
200005	Invalid amount specified	Unable to perform this transaction, the amount specified is invalid
200006	Multiple transactions with Sales Order Number provided	System error. Please contact customer support.
