

# **Equity IMT V2 Outbound**

Thunes Mobile Money

Release Notes

## Project Details

|                              |                         |
|------------------------------|-------------------------|
| <b>Project Name/ Jira ID</b> | PR52                    |
| <b>Application Name</b>      | imtCoreMS               |
| <b>Project Type</b>          | Software Development    |
| <b>Project Version</b>       | release-prod-1.2        |
| <b>Name of Releaser</b>      | Kennedy N. Gatimu       |
| <b>File Mode of Delivery</b> | jar, conf, sql, and yml |
| <b>Prepared By</b>           | Kennedy N. Gatimu       |

## Release History

| Date       | Version          | Author         | Comments                  |
|------------|------------------|----------------|---------------------------|
| 06/07/2021 | release-prod-1.1 | Kennedy Gatimu | Initial Release           |
| 12/11/2021 | release-prod-1.2 | Kennedy Gatimu | Fix wallet name selection |

## Delivery Details

This build is available in the form a jar - imtv2-outbound-core-0.0.1-SNAPSHOT.jar

Other files included in the build;

- i. imt-core.conf
- ii. application-prod.yml
- iii. imt-outbound-db-indexes.sql
- iv. lib folder

## Database Create Index

Run below queries to create indexes in the production database for the given table names.

Note: Include the schema on the table name. ie. <schema\_name>.<table\_name>

1. Table: imt\_out\_bound\_tran

```
CREATE INDEX index_status ON imt_out_bound_tran(status);  
CREATE INDEX index_transaction_id ON imt_out_bound_tran(transaction_id);  
CREATE INDEX index_reference_number ON imt_out_bound_tran(reference_number);  
CREATE INDEX index_transaction_type ON imt_out_bound_tran(transaction_type);
```

2. Table: imt\_out\_bound\_thunes\_Logger

```
CREATE INDEX index_rrn ON imt_out_bound_thunes_Logger(rrn);
```

3. Table: imt\_core\_configs

```
CREATE INDEX index_config_id ON imt_core_configs(config_id);
```

4. View The Indexes

```
SELECT * FROM sys.indexes WHERE object_id = OBJECT_ID('<schema_name>.<table_name>');
```

## Deploying Production Files

### 1. Backup Production Files

Take backup on the production files below;

- a. /u01/gag/imtv2/core/bin/imt-core-ms-0.0.1-SNAPSHOT.jar
- b. /u01/gag/imtv2/core/bin/config/application-prod.yml
- c. /u01/gag/imtv2/core/bin/lib folder
- d. /u01/gag/imtv2/core/conf/imt-core.conf

### 2. Deploy To Production

Copy the provided files to the below production paths respectively;

- a. /u01/gag/imtv2/core/bin/imt-core-ms-0.0.1-SNAPSHOT.jar
- b. /u01/gag/imtv2/core/bin/config/application-prod.yml
- c. /u01/gag/imtv2/core/bin/lib folder
- d. /u01/gag/imtv2/core/conf/imt-core.conf

3. Create environment at /u01/gag

```
cd /u01/gag
```

```
source j11_env.sh
```

4. Update yml file at target location with the supplied prod yml

```
cd /u01/gag/imtv2/core/bin
```

```
jar uf imt-core-ms-0.0.1-SNAPSHOT.jar config/application-prod.yml
```

5. Restart services at /u01/gag/imtv2/core/bin

```
sudo ./imt-core restart
```
