Transactions to Ethiopian Bank Accounts

The following guide explains how to retrieve the Entity TT ID (branch entity ID) through the Thunes API. For this the bank name and branch name are needed.

Required Credit Party Identifier: Bank Account Number, Entity TT ID

Confidentiality

All information contained in this document shall be kept in confidence. No part of this document is to be altered or copied without the written agreement of TransferTo Mobile Financial Services Ltd ("TTMFS"). None of this information shall be divulged to persons other than to authorised employees of TTMFS or any of TTMFS subsidiaries, and shall be on a need to know basis. Release of this document to other parties shall be to individuals of organisations authorised by TTMFS and in accordance with existing policy regarding release of company information and shall only be made available when an acceptable NDA has been signed with that party.

Step 1: Retrieve the bank entity code for the specific bank you wish to send to

Request to `v1/money-transfer/payers/PAYER_ID/entities`

Where **PAYER_ID** is the payer ID of the bank you want to send to.

For example (transaction to Lions Bank International - Bole Michael branch)

Request: `/v1/money-transfer/payers/793/entities`

Response

```
[
  {
    "address": null,
    "administrative_division": {
      "category": {
        "id": 7,
        "name": "Region"
      },
      "depth": 1,
      "id": 48962,
      "name": "Addis Ababa",
      "parent_id": null
    },
    "category": {
      "id": 1,
      "name": "Bank"
    },
    "country_iso_code": "ETH",
    "depth": 1,
    "id": 148866,
    "identifiers": [],
    "name": "Lion International Bank",
    "parent_id": null,
    "payers": [
      {
        "currency": "ETB",
        "id": 793,
        "name": "Ethiopia Lion International Bank"
      }
    ],
    "payment_systems": []
  }
]
```

The bank entity IT for “Lion International Bank” is 148866.

Step 2: Retrieve branch entity (Entity TT ID) for branch name

Request to `/v1/money-transfer/entities/ENTITY_ID/entities`

Where **ENTITY_ID** is the bank entity ID retrieved in step 1.

Response: ID associated with the correct Branch name, is the **Entity TT ID** (branch entity ID) needed to create a transaction in the Thunes API. Please make sure the Entity TT ID (branch entity ID) is associated with the correct region.

Example (transaction to Lions Bank International - Bole Michael branch)

Request `/v1/money-transfer/entities/148866/entities`

Response (shortened)

```
[
  { ... },
  { ... },
  {
    "address": "0344-460054 / 0154",
    "administrative_division": {

    "parent_id": 148866,
    "payers": [
        {
            "currency": "ETB",
            "id": 793,
            "name": "Ethiopia Lion International Bank"
        }
    ],
    "payment_systems": []
},
{
    "address": "0922-426767",
    "administrative_division": {
        "category": {
            "id": 7,
            "name": "Region"
        },
        "depth": 1,
        "id": 48963,
        "name": "Oromia",
        "parent_id": null
    },
    "category": {
        "id": 2,
        "name": "Branch"
    },
    "country_iso_code": "ETH",
    "depth": 2,
    "id": 149931,
    "identifiers": [],
    "name": "Bule Hora Branch",
    "parent_id": 148866,
    "payers": [
        {
            "currency": "ETB",
            "id": 793,
            "name": "Ethiopia Lion International Bank"
        }
    ],
    "payment_systems": []
}
]
```

The branch entity IT (Entity TT ID) for “Lion International Bank” - Bole Michael branch is 150991.

Step 3: Use bank account number and Entity TT ID to create transaction (usual flow)

a) Create quotation

b) Create transaction with

```
"credit_party_identifier": {  
  "bank_account_number": "Bank Account Number",  
  "entity_tt_id": "Entity TT ID"  
}
```

Example:

```
"credit_party_identifier": {  
  "bank_account_number": "xxxxxxx",  
  "entity_tt_id": "150991"  
}
```

c) Confirm transaction
